

Graded Routes Index

The below index categorizes routes by region and then subcategorizes by rating. If routes are between grades, the route is listed under the harder grade. Within each rating subcategory, routes are ordered alphabetically. Route quality (the number of stars out of three) and page numbers are listed to the right of route names. Ice routes and boulder problems are not included.

Routes by Region & Rating

CH 1 - Jackson, WY

5.6 (or easier)

|-------------------------------------|-----|

We are entering a new era of climbing, an era that may well be characterized by... the rendering of the mountains to a low, though democratic mean. Or it could be the start of more spiritual climbing, where we assault the mountains with less equipment and with more awareness, more experience and more courage.

- YVON CHOUINARD

If the conquest of a great peak brings moments of exultation and bliss, which in the monotonous, materialistic existence of modern times, nothing else can approach, it also presents great dangers. It is not the goal of grand alpinism to face peril, but it is one of the tests one must undergo to deserve the joy of rising, for an instant, above the state of crawling grubs. On this proud and beautiful mountain we have lived hours of fraternal, warm and exalting nobility. Here for a few days we have ceased to be slaves and have really been men.

It is hard to return to servitude...

- LIONEL TERRAY
